I think ObamaCare is just ridiculous. All this will serve to do is add more government jobs to go through the mountains of paperwork required by this SBC.

I think it is stupid to require us to do it in a "culturally and linguistically appropriate manner", particularly "culturally". Our language is English and it should only be provided in English. It is equally ridiculous to request us to provide interpretive services (with exclusion of the deaf).

The fines are ludicrous given the fact I think this is forcing socialized medicine, which I am in complete disagreement with.

For a company who pays 98% of our employees insurance, I think your plan hurts the "good guy" and is unconscionable.

Also, I think paperwork should only need to be provided on the plan selected, not every option out there. Just as expected, Government is trying to run the healthcare industry and trying to push capitalism out.

With disgust for the current government.

Sincerely,

Laurie Watts
Finance Director
